Recommendations (All)

At the end of our research, we explain its conclusion in a simple and quick way, we talked about Grammarly website and its goals for which this website was created The main goal of the creation focuses on improving the texts entered in the English language through grammar and rephrasing them in a scientific and accurate manner The above research explains all the details

We will mention some recommendations to improve the quality of site performance and output:

- **Verifying the recommendations provided by Grammarly and reviewing them carefully is important because they heavily rely on grammatical and spelling rules. It can be difficult for Grammarly to understand the context, and it may offer inaccurate and inappropriate suggestions or alternatives that do not accurately represent the intended meaning of the text.**
- **Adding more than one language to the website while improving grammar and spelling Three.**
- **Allow the website to be tested before logging in.**

All researchers worked on this research, and it was a group work. Each session was determined by everyone's agreement, and there was a female student responsible for managing each session. The name of the drummer is mentioned above.
